Chairman's Report

It is my pleasure to present the West Coast Regional Council's 2019/2020 Annual Report.

Local government elections resulted in several changes around the Council table in October 2019. I would like to welcome our new Councillors, John Hill, Laura Coll McLaughlin, Debra Magner and Brett Cummings, and look forward to their contributions and leadership for the West Coast in the coming years. A change in Councillors meant that we had to farewell Terry Archer, Neal Clementson, Peter McDonnell and Andrew Robb. I would like to take this opportunity to thank them for their service to our community and wish them well for the future.

At the end of the financial year, Council realised a surplus of \$1.657 million compared to the \$444,000 that had been budgeted for. This surplus was primarily as a result of the insurance and National Emergency Management Agency (NEMA) monies relating to the 26 March 2019 flood event for the rebuild of the "Milton" stop-bank on the Waiho River. This money was reinvested in the rebuild of this asset reflected in the increase in assets on the balance sheet. Repairs to other infrastructure damaged in the same event, was achieved with minimal cost to the communities affected. This was due to the infrastructure insurance we had in place, support from NEMA and the excellent work of the contractors involved. I would also like to acknowledge the significant amount of work undertaken by Council's engineering team, under the management of Randal Beal our Operations Director, and their dedication to our community.

Our river, drainage and coastal protection infrastructure remains our biggest, and arguably most important, asset. Spread across 27 rating districts, these assets are worth approximately \$88 million which includes approximately 70km of stopbanks. In addition Council maintains the Greymouth Floodwall which has a value of approximately \$15 million and which is still owned by Grey District Council as at 30 June 2020. The choices we have made in the past on where we live and do business have made us susceptible to natural hazards. These assets protect our communities as well as providing for our economic, social and cultural wellbeing so can get on and live our lives.

The events of 2020 were unprecedented. Like many other businesses and public entities in New Zealand, and globally, we also had to work through the disruptions COVID-19 threw at us. Our staff carried on, working remotely and adopting new practices to ensure that essential services such as flood warning and emergency management continued. Like many, we learnt a lot through this time which will stand us in good stead in the future. I appreciate the efforts and achievements of all of our staff to ensure that we continued to deliver on our levels of service.

Council Chief Executive Mike Meehan departed in July 2020 having been with the organisation in various roles since 2004. Under his leadership, Council made significant progress, particularly in the provision of civil defence emergency management and the partnership with Poutini Ngāi Tahu, and with key projects including Predator Free Te Kinga and the securing of COVID-19 stimulus funding for infrastructure resilience projects. I wish him all the best for the future.

The Council has seven Councillors, representing the following constituencies:

Buller Constituency

Laura Coll McLaughlin - Councillor John Hill - Councillor

Grey Constituency

Peter Ewen - Councillor Allan Birchfield – Councillor, Council Chairman Brett Cummings - Councillor

Westland Constituency

Debra Magner – Councillor Stuart Challenger – Councillor, Deputy Chairperson

Back row: Clr Brett Cummings, Clr Stuart Challenger, Clr John Hill, Clr Peter Ewen Front row: Clr Debra Magner, Clr Allan Birchfield (Chairman), Clr Laura Coll McLaughlin

Council Organisation Structure

Council (All Elected Councillors)

Committee (Elected Councillors plus 2 Ngāi Tahu appointed representatives)

Resource Management

Chief Executive Officer - Michael Meehan

Division	Manager	Functions
Chief Executive Officer	Michael Meehan	Civil Defence Emergency Management Regional Transport Planning
Consents & Compliance Group	Heather McKay	Resource Consent Processing Compliance Monitoring & Enforcement Environmental Incident Complaints Pollution Response
Planning & Science	Hadley Mills	IT Regional Planning Science Hydrology
Operations	Randal Beal	VCS Business Unit Engineering Quarries Biosecurity
Corporate Services	Robert Mallinson	Corporate Support
Strategy & Communications	Nichola Costley	Strategy & Communications
Civil Defence	Claire Brown	Civil Defence & Emergency Management
People & Capability Manager	Kim Hibbs	Human Resources

Community Outcomes

In the Long Term Plan 2018-2028 the West Coast Regional Council identified the following three high-level Community Outcomes:

Economy: A thriving, resilient and innovative economy is promoted, which creates many opportunities for growth,

wealth generation and employment.

Environment: The high quality and distinctive character of our environment is retained. **Safety:** A region that is a safe place to live, with strong community spirit and cohesion.

The Council activities set out in this Annual Report relate to the achievement of the above outcomes as follows:

Activity Area	Community Outcomes
Governance	Economy, Environment and Safety
Resource Management Activities	Economy, Environment and Safety
Regional Transport Planning	Economy, Environment and Safety
Hydrology & Flood Warning Services	Economy, Environment and Safety
Civil Defence Emergency Management	Economy, Environment and Safety
River, Drainage & Coastal Protection Works: Rating Districts & Quarries	Economy, Environment and Safety
Vector Control Services Business Unit	Economy, Environment and Safety

Measurement of Progress towards achievement of Community Outcomes

Schedule 10 – clause 23 (c) of the Local Government Act 2002 requires Council to report the results of any measurement undertaken during the year of progress towards the achievement of community outcomes.

Council has not undertaken any such measurement during the year.

Report on Activities Undertaken to Provide Opportunities for Māori to Contribute to Decision Making Processes

(Local Government Act 2002, Schedule 10, Clause 35)

Council has continued to invite representation on its Resource Management Committee from representatives of both local Rūnanga, Te Rūnanga o Ngāti Waewae and Te Rūnanga o Makaawhio.

Statement of Compliance and Responsibility

Compliance

The Council and management of the West Coast Regional Council confirm that not all the statutory requirements of the Local Government Act 2002 have been complied with.

Responsibility

- 1. The Council and management of the West Coast Regional Council accept responsibility for the preparation of the annual financial statements and the judgements used in them.
- The Council and management of the West Coast Regional Council accept responsibility for establishing and maintaining a system of internal control designed to provide reasonable assurance as to the integrity and reliability of financial reporting.
- 3. In the opinion of the Council and management of the West Coast Regional Council, the annual financial statements for the year ended 30 June 2020 fairly reflects the financial position and operations of the West Coast Regional Council.
- 4. West Coast Regional Council hereby confirms that all statutory requirements contained in the Local Government Act 2002, in relation to the Annual Report 2019/2020 have been complied with except the adoption of the Annual Report.

Council adopted this Annual Report on 9 June 2021 and therefore did not meet the statutory deadline for adoption.

A. Birchfield Chairman

Heather Mabin Acting Chief Executive

Dated: 9 June 2021

Report by Audit New Zealand

AUDIT NEW ZEALAND

Mana Arotake Aotearoa

Independent Auditor's Report

To the readers of West Coast Regional Council's Annual Report for the year ended 30 June 2020

The Auditor-General is the auditor of West Coast Regional Council (the Regional Council). The Auditor-General has appointed me, Chris Genet, using the staff and resources of Audit New Zealand, to report on the information in the Regional Council's annual report that we are required to audit under the Local Government Act 2002 (the Act). We refer to this information as "the audited information" in our report.

We are also required to report on:

- whether the Regional Council has complied with the requirements of Schedule 10 of the Act that apply to the annual report; and
- the completeness and accuracy of the Regional Council's disclosures about its performance against benchmarks that are required by the Local Government (Financial Reporting and Prudence) Regulations 2014.

We refer to this information as "the disclosure requirements" in our report.

We completed our work on 9 June 2021. This is the date on which we give our report.

Opinion

Qualified opinion on the financial statements - Our work was limited over the financial information relating to the associate

In our opinion, except for the possible effects of the matters described in the Basis for our qualified opinion section of our report:

- the financial statements on pages 12 to 37 and pages 73 to 75:
 - present fairly, in all material respects:
 - the Regional Council's financial position as at 30 June 2020; and
 - the results of its operations and cash flows for the year ended on that date; and
 - comply with generally accepted accounting practice in New Zealand in accordance with Public Benefit
 Entity Reporting Standards Reduced Disclosure Regime.

Unmodified opinion on the audited information, excluding the financial statements

In our opinion:

- the funding impact statement on page 56, presents fairly, in all material respects, the amount of funds produced from each source of funding and how the funds were applied as compared to the information included in the Regional Council's long-term plan;
- the statement of service performance on pages 38 to 55:
 - presents fairly, in all material respects, the Regional Council's levels of service for each group of activities
 for the year ended 30 June 2020, including:
 - the levels of service achieved compared with the intended levels of service and whether any intended changes to levels of service were achieved; and
 - the reasons for any significant variation between the levels of service achieved and the intended levels of service; and
 - complies with generally accepted accounting practice in New Zealand.
- the statement about capital expenditure for each group of activities on pages 57 to 65, presents fairly, in all material respects, actual capital expenditure as compared to the budgeted capital expenditure included in the Regional Council's long-term plan; and
- the funding impact statement for each group of activities on pages 57 to 65, presents fairly, in all material respects, the amount of funds produced from each source of funding and how the funds were applied as compared to the information included in the Regional Council's long-term plan.

Basis for our qualified opinion

The Regional Council has included in the financial statements information relating to an investment in an associate, Pest Control Research Limited Partnership (the associate). The Regional Council's financial statements include an investment in the associate of \$414,248 (2019 \$943,175), the share of the associate's surplus of \$124,490 (2019 deficit of \$45,574), associate investment impairment of \$696,611 (2019 nil), and loan advances to the associate of \$374,783 (2019 nil). The Regional Council sold its interest in the associate after the balance date. Further information about the associate is disclosed in Notes 10, 19 and 23 to the financial statements.

The associate's auditor issued a disclaimer of opinion on the associate's financial statements for the year ended 31 March 2020. This was because the auditor was unable to obtain sufficient appropriate audit evidence to form an opinion whether the application of the going concern assumption in the preparation and presentation of the associate's financial statements was appropriate.

Further, our audit opinion on the Regional Council's 30 June 2019 financial statements was modified because the Regional Council included unaudited financial information relating to the associate. That information has since been audited by the associate's auditor. However, the associate's auditor issued a disclaimer of opinion on the 2019 financial information, because they were unable to obtain sufficient assurance over inventory, including the provision for obsolescence. As a result, the auditor was unable to determine whether any adjustments to these amounts were necessary and what the impact of any adjustment would be. Consequently, we are unable to determine whether the comparative year information related to the associate is fairly stated.

Because of the effects of the above matters, we have been unable to obtain sufficient appropriate audit evidence to support the financial information relating to the associate. This includes the investment in associate, impairment of associate, share of the associate's surplus/(deficit), loan advance, and any possible impairment of loan advances. Any misstatement of this financial information could affect the Regional Council's statement of financial position and statement of comprehensive revenue and expense.

We carried out our audit in accordance with the Auditor-General's Auditing Standards, which incorporate the Professional and Ethical Standards and the International Standards on Auditing (New Zealand) issued by the New Zealand Auditing and Assurance Standards Board. We describe our responsibilities under those standards further in the "Responsibilities of the auditor for the audited information" section of this report.

We have fulfilled our responsibilities in accordance with the Auditor-General's Auditing Standards.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified opinion on the audited information.

Report on the disclosure requirements

We report that the Regional Council has:

- complied with the requirements of Schedule 10 of the Act that apply to the annual report; and
- made the disclosures about performance against benchmarks as required by the Local Government (Financial Reporting and Prudence Regulations 2014) on pages 66 to 72, which represent a complete list of required disclosures and accurately reflects the information drawn from the Regional Council's audited information and, where applicable, the Regional Council's long-term plan and annual plans.

However, we draw attention to the fact that the benchmark results for 2019 and 2020 were compiled using figures from the audited financial statements, which we issued a modified audit opinion on, as outlined above.

Emphasis of matter - Impact of COVID-19

Without further modifying our opinion, we draw attention to the disclosures about the impact of COVID-19 on the Regional Council as set out in Note 22 of the financial statements. We draw specific attention to the following matter due to the significant level of uncertainty caused by COVID-19:

Investment property

Note 13 on page 31 describes the material uncertainties highlighted by the valuer, related to estimating the fair values of the Regional Council's investment property.

Responsibilities of the Council for the audited information

The Council is responsible for meeting all legal requirements that apply to its annual report.

The Council's responsibilities arise under the Local Government Act 2002 and the Local Government (Financial Reporting and Prudence) Regulations 2014.

The Council is responsible for such internal control as it determines is necessary to enable it to prepare the information we audit that is free from material misstatement, whether due to fraud or error.

In preparing the information we audit the Council is responsible for assessing its ability to continue as a going concern. The Council is also responsible for disclosing, as applicable, matters related to going concern and using the going concern basis of accounting, unless there is an intention to amalgamate or cease all of the functions of the Regional Council or there is no realistic alternative but to do so.

Responsibilities of the auditor for the audited information

Our objectives are to obtain reasonable assurance about whether the audited information, as a whole, is free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion.

Reasonable assurance is a high level of assurance but is not a guarantee that an audit carried out in accordance with the Auditor General's Auditing Standards will always detect a material misstatement when it exists. Misstatements are differences or omissions of amounts or disclosures and can arise from fraud or error. Misstatements are considered material if, individually or in the aggregate, they could reasonably be expected to influence the decisions of readers taken on the basis of this audited information.

For the budget information reported in the audited information, our procedures were limited to checking that the budget information agreed to the Regional Council's annual plan.

We did not evaluate the security and controls over the electronic publication of the audited information.

As part of an audit in accordance with the Auditor-General's Auditing Standards, we exercise professional judgement and maintain professional scepticism throughout the audit. Also:

- We identify and assess the risks of material misstatement of the audited information, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- We obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Regional Council's internal control.
- We evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Council.
- We determine the appropriateness of the reported intended levels of service in the statement of service performance, as a reasonable basis for assessing the levels of service achieved and reported by the Regional Council.
- We conclude on the appropriateness of the use of the going concern basis of accounting by the Council and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast a significant doubt on the Regional Council's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the audited information or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Regional Council to cease to continue as a going concern.

 We evaluate the overall presentation, structure and content of the audited information, including the disclosures, and whether the audited information represents, where applicable, the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Council regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other Information

The Council is responsible for the other information included in the annual report. The other information comprises the information included on pages 1 to 6, but does not include the audited information and the disclosure requirements.

Our opinion on the audited information and our report on the disclosure requirements do not cover the other information.

Our responsibility is to read the other information. In doing so, we consider whether the other information is materially inconsistent with the audited information and the disclosure requirements, or our knowledge obtained during our work, or otherwise appears to be materially misstated. If, based on our work, we conclude that there is a material misstatement of this other information, we are required to report that fact. As described in the Basis for our qualified opinion section above, we were unable to form an opinion on the financial information relating to the associate. Accordingly, we are unable to conclude on whether or not the other information that includes financial information about the performance of the Regional Council is materially misstated with respect to this matter. Except for this matter we have nothing to report in this regard.

Independence

We are independent of the Regional Council in accordance with the independence requirements of the Auditor-General's Auditing Standards, which incorporate the independence requirements of Professional and Ethical Standard 1: International Code of Ethics for Assurance Practitioners issued by the New Zealand Auditing and Assurance Standards Board.

In addition to our audit and our report on the disclosure requirements, we have carried out a limited assurance engagement related to the Regional Council's debenture trust deed, which is compatible with those independence requirements. Other than this engagement, we have no relationship with or interests in the Regional Council.

كالله في المالي

Audit New Zealand On behalf of the Auditor-General Christchurch, New Zealand

Statement of Accounting Policies for year ended 30 June 2020

Reporting Entity

The West Coast Regional Council (WCRC) is a public benefit entity (PBE) for financial reporting purposes.

The financial statements of WCRC are for the year ended 30 June 2020. The financial statements were authorised for issue by Council on 9 June 2021.

Basis of preparation

The financial statements have been prepared on the going concern basis, and the accounting policies have been applied consistently throughout the period.

The financial statements have been prepared in accordance with the requirements of the Local Government Act 2002 (LGA 2002), which include the requirement to comply with generally accepted accounting practice in New Zealand (NZ GAAP).

The financial statements have been prepared in accordance with Tier 2 PBE accounting standards reduced disclosure regime.

WCRC qualifies as a Tier 2 entity as its total expenditure is less than \$30 million per annum.

These financial statements comply with the PBE standards RDR.

These financial statements are presented in New Zealand dollars.

Investment in Associates and Council Controlled Organisations

The Council's investments in these entities are accounted for using the equity method. An associate is an entity over which the Council has significant influence and that is neither a subsidiary nor an interest in a joint venture. The investment in an associate is initially recognised at cost and subsequently equity accounted.

Council's investment in Pest Control Research Limited Partnership (49%) is an investment in an Associate in terms of PBE IPSAS 36 Investments in Associates and Joint Ventures.

Revenue

Revenue is measured at the fair value of consideration received or receivable.

Revenue from exchange and non-exchange transactions

Revenue from exchange transactions arises where the Council provides goods or services to another entity and directly receives approximately equal value (primarily in the form of cash in exchange).

Revenue from non-exchange transactions arises from transactions that are not exchange transactions. Revenue from non-exchange transaction arises when the Council receives value from another party without giving approximately equal value directly in exchange for the value received.

Approximately equal value is considered to reflect a fair or market value, which is normally commensurate with an arm's length commercial transaction between a willing buyer and willing seller. Many of the services that the Council provides for a fee are charged at below market value as they are subsidised by rates. Other services operate on a cost recovery or break-even basis and are not considered to reflect a market return. Most of the Council's revenue is therefore categorised as non-exchange. Specific accounting policies for major categories of revenue are outlined below. The Council undertakes various activities as part of its normal operations, some of which generate revenue, but generally at below market rates. The following categories (except where noted) are classified as transfers, which are non-exchange transactions other than taxes.

Rates revenue

Rates are set annually by a resolution from Council and relate to a financial year. All ratepayers are invoiced within the financial year to which the rates have been set. Rates revenue is recognised at the start of the year to which the resolution relates.

Recoveries from Ministry of Civil Defence & Emergency Management

Recoveries from the Ministry of Civil Defence and Emergency Management are recognised following the grant approach. Revenue is recognised as eligible costs are incurred.

Other revenue

WCRC receives government grants from the New Zealand Transport Agency, which subsidises part of WCRC costs in carrying out its land transport responsibilities. The subsidies are recognised as revenue upon entitlement as conditions pertaining to eligible expenditure have been fulfilled.

Revenue from the rendering of services is recognised by reference to the stage of completion of the transaction at balance date, based on the actual service provided as a percentage of the total services to be provided. Interest income is recognised using the effective interest method. Dividends are recognised when the right to receive payment has been established.

Sale of Goods

Revenue from the sale of goods is recognised when a product is sold to the customer.

Borrowing costs

Borrowing costs are recognised as an expense in the period in which they are incurred.

Finance leases

A finance lease is a lease that transfers to the lessee substantially all the risks and rewards incidental to ownership of an asset, whether or not title is eventually transferred. At the commencement of the lease term, WCRC recognises finance leases as assets and liabilities in the statement of financial position at the lower of the fair value of the leased item or the present value of the minimum lease payments. The finance charge is charged to the surplus or deficit over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability. The amount recognised as an asset is depreciated over its useful life. If there is no certainty as to whether WCRC will obtain ownership at the end of the lease term, the asset is fully depreciated over the shorter of the lease term and its useful life.

Operating leases

An operating lease is a lease that does not transfer substantially all the risks and rewards incidental to ownership of an asset. Lease payments under an operating lease are recognised as an expense on a straight-line basis over the lease term.

Trade and other receivables

Trade and other receivables are initially measured at face value, less any provision for impairment. A provision for impairment of receivables is established when there is objective evidence that WCRC will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted using the effective interest method.

Inventories

Inventories held for consumption in the provision of services that are not supplied on a commercial basis are measured at cost. The write down from cost to current replacement cost, or net realisable value, is recognised in the surplus or deficit.

Inventories held for use in the provision of goods and services on a commercial basis are valued at the lower of cost (using the "First in First Out" method) and net realisable value.

Derivative financial instruments and hedge accounting

Derivative financial instruments are used to manage exposure to foreign exchange and interest rate risks arising from financing activities. In accordance with its treasury policy, the Council does not hold or issue derivative financial instruments for trading purposes.

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value at each balance date. The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and, if so, the nature of the item being hedged.

The associated gains or losses of derivatives that are not hedge accounted are recognised in the surplus or deficit.

Council has not designated any derivatives as hedging instruments.

The Council designates certain derivatives as either:

- Hedges of the fair value of recognised assets or liabilities or a firm commitment (fair value hedge); or
- Hedges of highly probable forecast transactions (cash flow hedge).

The Council documents at the inception of the transaction the relationship between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. The Council also documents its assessment, both at hedge inception and on an ongoing basis, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items.

The full fair value of a derivative is classified as non-current if the remaining maturity of the hedged item is more than 12 months, and as current if the remaining maturity of the hedged item is less than 12 months.

Other Financial assets

WCRC has two classifications for its financial assets:

- Financial assets at fair value through surplus or deficit.
- Loans and receivables.

The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition and re-evaluates this designation at every reporting date.

Financial assets are initially measured at fair value plus transaction costs unless they are carried at fair value through surplus or deficit in which case the transaction costs are recognised in the surplus or deficit. The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. Council fund manager JBWere obtains independent verified market prices from third parties such as trading banks, broking houses and originating companies for all assets/securities. Managed funds are valued at the value date price used as the exit price at month end and can be deemed to be fair value. JBWere valuations use the redemption unit price to value unit trust products. The value of a unit is based on the net value of the relevant fund.

The two categories of financial assets that apply to WCRC are:

(1) Financial assets at fair value through surplus or deficit

This category has two sub-categories: financial assets held for trading, and those designated at fair value through surplus or deficit at inception. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term or if so designated by management. Derivatives are also categorised as held for trading unless they are designated as hedges. Assets in this category are classified as current assets if they are either held for trading or are expected to be realised within 12 months of the balance sheet date. After initial recognition they are measured at their fair values. Gains or losses on re-measurement are recognised in the surplus or deficit. Financial assets in this category include derivatives and Council's investment portfolio and the LGFA borrower notes.

(2) Loans and receivables

These are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial recognition they are measured at amortised cost using the effective interest method, less impairment. Gains and losses

when the asset is impaired or derecognised are recognised in the surplus or deficit. Loans and receivables are classified as "trade and other receivables" in the statement of financial position.

There are also assets in trade and other receivables that are not financial assets such as the right to receive rock.

Impairment of financial assets

At each balance sheet date WCRC assesses whether there is any objective evidence that a financial asset or group of financial assets is impaired. Any impairment losses are recognised in surplus or deficit.

Property, plant and equipment

Property, plant and equipment consists of:

- · Operational assets These include land, buildings, plant and equipment, and motor vehicles.
- Infrastructure assets Infrastructure assets are the river, drainage and coastal protection systems owned by WCRC. They include rock protection work and stopbanks.

Property, plant and equipment is shown at cost or valuation, less accumulated depreciation and impairment losses.

Additions

The cost of an item of property, plant and equipment is recognised as an asset if, and only if, it is probable that future economic benefits or service potential associated with the item will flow to WCRC and the cost of the item can be measured reliably. In most instances, an item of property, plant and equipment is recognised at its cost. Where an asset is acquired at no cost, or for a nominal cost, it is recognised at fair value as at the date of acquisition.

Disposals

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount of the asset. Gains and losses on disposals are included in the surplus or deficit. When revalued assets are sold, the amounts included in asset revaluation reserves in respect of those assets are transferred to retained earnings.

Subsequent costs

Costs incurred subsequent to initial acquisition are capitalised only when it is probable that future economic benefits or service potential associated with the item will flow to WCRC and the cost of the item can be measured reliably. The costs of day to day servicing of property, plant and equipment are recognised in the surplus or deficit as they are incurred.

Depreciation

Depreciation is provided on a straight-line basis on all property, plant and equipment other than land and river protection systems, at rates that will write off the cost (or valuation) of the assets to their estimated residual values over their useful lives. Due to the nature of the river systems and the structural composition of river protection works, no decline in service potential occurs.

The useful lives and associated depreciation rates of major classes of assets have been estimated as follows:

Item	Estimated life	Rate
Buildings (non-component items)	50 – 67 years	1.5% - 2%
Portable buildings	10 years	10%
Building components	6.7 – 20 years	5% - 15%
Plant and Equipment	4 - 6.7 years	15% - 25%
Truck	6.7 years	15%
Motor Vehicle	6 - 7 years	15%
Capitalised Quarry costs	Based on the pattern of benefits from the Quarry	Not applicable

The residual value and useful life of an asset is reviewed, and adjusted if applicable, at each financial year-end.

Revaluation

Operational assets are valued on a three yearly valuation cycle on the basis described below. All other asset classes are carried at depreciated historical cost. The carrying values of revalued items are reviewed at each balance date to ensure that those values are not materially different to fair value.

Operational land:

This is revalued on a cyclical 3-year basis at fair value as determined from the most recent market based rating valuations. Valuations are as at 1 September 2018 (Grey District area land), 1 September 2020 (Westland District area land), and 1 September 2019 (Buller District area land).

Infrastructural asset classes: River, Drainage and Coastal Protection Assets

These assets are now valued at fair value determined on a replacement cost basis by AON Valuation Services. The most recent valuation was prepared by AON Valuation Services as at 30 June 2020.

Accounting for revaluations:

WCRC accounts for revaluations of property, plant and equipment on a class of asset basis. The results of revaluing are credited or debited to an asset revaluation reserve for that class of asset and other comprehensive income. Where this results in a debit balance in the asset revaluation reserve, this balance is expensed in the surplus or deficit. Any subsequent increase on revaluation that off-sets a previous decrease in value recognised in the surplus or deficit will be recognised first in the surplus or deficit up to the amount previously expensed, and then credited to the revaluation reserve for that class of asset and other comprehensive income.

Intangible assets

Software acquisition and development

Acquired computer software licenses are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. Costs associated with maintaining computer software are recognised as an expense when incurred.

Amortisation

The carrying value of an intangible asset with a finite life is amortised on a straight-line basis over its useful life. Amortisation begins when the asset is available for use and ceases at the date that the asset is derecognised. The amortisation charge for each period is recognised in the surplus or deficit.

The useful lives and associated amortisation rates of major classes of intangible assets have been estimated as follows:

	Estimated life	Rate
Computer Software	3.3 – 10 years	10% - 30%

Impairment of non-financial assets

Assets that have a finite useful life and are measured at cost are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use.

Value in use is depreciated replacement cost for an asset where the future economic benefits or service potential of the asset are not primarily dependent on the asset's ability to generate net cash inflows and where the entity would, if deprived of the asset, replace its remaining future economic benefits or service potential.

The value in use for cash-generating assets is the present value of expected future cash flows. If an asset's carrying amount exceeds its recoverable amount, the asset is impaired and the carrying amount is written down to the recoverable amount.

For revalued assets the impairment loss is recognised against the revaluation reserve for that class of asset. Where that results in a debit balance in the revaluation reserve, the balance is recognised in the surplus or deficit.

The total impairment loss is recognised in the surplus or deficit.

Investment property

Property leased, or intended to be leased to third parties under operating leases, is classified as investment property unless the property is held to meet service delivery objectives, rather than to earn rentals or for capital appreciation. Investment property is measured initially at cost, including transaction costs. After initial recognition, all investment property is measured at fair value as determined annually by an independent valuer. Gains or losses arising from a change in the fair value of the investment property are recognised in the surplus or deficit.

Employee benefits

Short-term benefits

Employee benefits that WCRC expects to be settled within 12 months of balance date are measured at nominal values based on accrued entitlements at current rates of pay. These include salaries and wages accrued up to balance date, annual leave earned to, but not yet taken at balance date, retiring and long service leave entitlements expected to be settled within 12 months.

Long-term benefits:

Long service leave

Entitlements that are payable beyond 12 months, such as long service leave have been calculated on an actuarial basis. The calculations are based on likely future entitlements accruing to staff, based on years of service, years to entitlement, the likelihood that staff will reach the point of entitlement and contractual entitlements information;

Superannuation schemes

Defined contribution schemes

Obligations for contributions to defined contribution superannuation schemes are recognised as an expense in the surplus or deficit as incurred.

Provisions

WCRC recognises a provision for future expenditure of uncertain amounts or timing when there is a present obligation (either legal or constructive) as a result of a past event. It is probable that expenditures will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are not recognised for future operating losses. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pretax discount rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to the passage of time is recognised as an interest expense.

Borrowings

Borrowings are initially recognised at their fair value. After initial recognition, all borrowings are measured at amortised cost using the effective interest method.

Equity

Equity is the community's interest in WCRC and is measured as the difference between total assets and total liabilities. Equity is disaggregated and classified into a number of reserves. The components of equity are:

- Retained earnings;
- · Restricted reserves; and
- Asset revaluation reserves.

Restricted and Council created reserves

Restricted reserves are a component of equity generally representing a particular use to which various parts of equity have been assigned. Reserves may be legally restricted or created by WCRC. Restricted reserves are those subject to specific conditions accepted as binding by WCRC and which may not be revised by WCRC without reference to the Courts or a third party. Transfers from these reserves may be made only for certain specified purposes or when certain specified conditions are met. Also included in restricted reserves are reserves restricted by Council decision. The Council may alter them without references to any third party or the Courts. Transfers to and from these reserves are at the discretion of the Council.

Goods and Services Tax (GST)

All items in the financial statements are stated exclusive of GST, except for receivables and payables, which are stated on a GST inclusive basis. Where GST is not recoverable as input tax then it is recognised as part of the related asset or expense. The net amount of GST recoverable from, or payable to, the Inland Revenue Department (IRD) is included as part of receivables or payables in the statement of financial position. The net GST paid to, or received from the IRD, including the GST relating to investing and financing activities, is classified as an operating cash flow in the statement of cash flows. Commitments and contingencies are disclosed exclusive of GST.

Budget figures

The budget figures are those approved by the Council at the beginning of the year in the LTP/Annual Plan. The budget figures have been prepared in accordance with NZ GAAP, using accounting policies that are consistent with those adopted by WCRC for the preparation of the financial statements.

Cost allocation

WCRC has derived the cost of service for each significant activity of WCRC using the cost allocation system outlined below. Direct costs are those costs directly attributable to a significant activity. Indirect costs are those costs, which cannot be identified in an economically feasible manner, with a specific significant activity. Direct costs are charged directly to significant activities. Indirect costs are charged to significant activities using appropriate cost drivers such as actual usage, staff numbers and floor area.

Critical accounting estimates and assumptions

In preparing these financial statements WCRC has made estimates and assumptions concerning the future. These estimates and assumptions may differ from the subsequent actual results. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations or future events that are believed to be reasonable under the circumstances.

There are estimates and assumptions of fair value of Infrastructure, Quarry Restoration Provision and Capitalised Quarry Development costs that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

West Coast Regional Council does not recognise community owned protection assets until they are formally inspected for condition and performance. Once appropriate service level decision are made, the assets will be accepted to vest in Council.

Council lent \$374,783 to its Associate Pest Control Research Limited Partnership (the tenant of 8 Centrum Lane, Rolleston) to fund specialised lease improvements carried out at 8 Centrum Land Rolleston. The Loan is repayable over 10 years from 30 June 2020 at 6.5% and Council received a monthly specialised lease improvement rental to fund the repayments.

There was no impairment provision for Other Financial Assets.

These investments are held by Council in accordance with its Investment Policy to create income to be used to fund council activities and to be able to be reinvested to ensure portfolio growth over time.

	Balance @ 1 July	1,600,000
	Additions from acquisitions	-
	Additions from subsequent expenditure	-
	Disposals	-
	Transfer to inventory	-
	Fair value gains / -losses on valuation	106,000
	Closing Balance 30 June	1,706,000

Investment properties are valued annually effective at 30 June to fair value in accordance with PBE IPSAS 16. Gary Sellars FNZIV, FPINZ, an independent registered valuer from Colliers International Valuation (ChCh) Limited, performed the most recent valuation. Colliers International Valuation (ChCh) Limited is an experienced valuer with extensive market knowledge in the type and location of investment property owned by the West Coast Regional Council. The valuer has highlighted there is currently material valuation uncertainty caused by the COVID-19 pandemic.

22. COVID

On 31 December 2019 China alerted the World Health Organisation to the outbreak of a virus, now commonly referred to as COVID-19. The outbreak was declared a pandemic on 11 March 2020. The New Zealand Government declared a State of National Emergency on 25 March 2020. The next day the country was put into Alert Level 4 and effectively lockdown. On 28 April 2020, the Alert Level was reduced to Level 3, and then further reduced to Level 2 on 14 May 2020. The country moved to Level 1 on 9 June 2020.

Overall, the Council assessed that COVID-19 has had minimal impact on the financial and operational results for the year ended 30 June 2020. Lock down slowed down the Capital project delivery programme for a short period of time. Performance in some individual activity areas was also impacted.

Council activities in Engineering Consents and Compliance were considered essential services and remained in operation with strict health and safety protocols following the guidance provided by Central Government's COVID-19 Taskforce. For full details of the impact on activity performance and the work Council undertook, refer to the statement of service performance on pages 38 – 55. While the lockdown and potential future impacts of COVID-19 may negatively impact residents' ability to pay rates in the future, as at 30 June 2020 this was not the case.

23. Significant Post Balance Date Events

The Council's investment property portfolio was revalued as at 30 June 2020. The valuer has highlighted there is currently a material valuation uncertainty caused by the COVID-19 pandemic. Refer to Note 13 of this report.

Provincial Growth Fund

Post 30 June 2020 Council has received approval for \$6,075,000 in funding for capital projects from the Provincial Growth Fund (PGF) outside what has been planned for 2020/2021. Funding agreements were signed during November for the below projects:

- \$3,750,000 for Hokitika Flood and Coastal Erosion Protection with co-funding from West Coast Regional Council of \$3,200,000. This work is expected to be completed no later than July 2022.
- \$1,950,000 for Mawhera Quay Flood Protection wall upgrade with co-funding from West Coast Regional Council of \$650,000. This work is expected to be completed no later than January 2022.
- \$375,000 for Westport (Buller River) Flood Warning System with co-funding from West Coast Regional Council of \$155,000. This work is expected to be completed no later than November 2021.

Investment in other Entities

On 4 December 2020 Council sold its 49% interest in Pest Control research Limited Partnership to the 51% majority shareholder for \$1. As the subscribed capital sold totalled \$696,612 this resulted in a loss of \$696,611. The Council impaired its investment and this loss is included in the Statement of Comprehensive Revenue and Expense for the year to 30 June 2020 on page 19.

Council share of retained profits at 31 March 2020 less share of loss 1 April to 31 October 2020 were paid out to Council on 4 December 2020.

The total payment received on 4 December 2020 amounted to \$379,237.

The loan to the Limited Partnership is still outstanding and payments have been received on schedule to date.

24. Contingent Liabilities @ 30 June 2020

Council is the subject of a claim for >\$30,000,000 by Scenic Circle Hotel Group Limited. The claim is denied and will be defended by Council with the backing of its public liability insurer. (2019 \$30,000,000)

25. Contingent Assets @ 30 June 2020

Contingent assets were valued at \$157,025 as per note 26 Related Part Transaction (2019 \$157,025).

26. Related Party Transaction

Council's VCS Business Unit has an agreement with Birchfield Minerals Ltd (elected West Coast Regional Councilor Allan Birchfield) with regard to the costs of obtaining the Grey River Dredge consent as part of the process of readying the Dredge for sale.

VCS Business Unit will recover the costs of the resource consent and various marketing costs (\$157,025 @ 30 June 2020) + a % of the sale price if a sale agreement for the Dredge is secured. There can be no absolute certainty of recovery of these costs until a sale agreement for the Dredge is secured.

During 2019/20 no costs were incurred by VCS Business unit with regard to this consent. (2018/19 \$Nil)

27. Severance Payments

There were no severance payments made to 30 June 2020. (2019 \$nil)

28. Future Quarry Restoration Liability at 30 June 2020

Assessed liability as at 30 June 2020 \$442,802. This liability is calculated using a net present value approach to discounting future cash flows. (2019 \$576,540)

(a) Restoration Provision Note

The Council holds Mining permits for eight quarry sites. The provision for restoration of quarries is provided to satisfy obligations relating to site restoration once mining is completed. The timing of expected cash outflow is between 13-48 years and is based on the remaining life to expiry of the permit. The permits may be renewed and this would likely extend the timeframes until the outflow of cash are required. The provision is calculated using a discounted cash flow model based on current expectations of costs to restore the sites. Please see note

29.

Actual 2019		Actual 2020
398,000	Opening Balance 1 July 2019 Additions to the provision	576,540
172,540	Change to Discount Rate	-
	Disposal of Permit	(140,881)
6,000	Time Value Adjustment	7,143
576,540	Closing Balance 30 June 2020	442,802

30. Critical Accounting estimates and judgements

The provision for restoration requires estimates of the future costs of restoration of eight mining sites. Discounted cash flow analysis is used to assess the future liability and this is peer reviewed. The major assumption inputs into the estimate that could have a material impact on the provision amount in the next 12 months are outlined below:

Discount rate: The discount rate applied to the provision is 1.10% to 2.28% depending on the life of the quarry. This is the New Zealand Treasury risk free rate and is updated if required each year. Management consider it unlikely that the Treasury risk free rate will change materially in the next 12 months.

Expected costs: The expected costs of restoration are considered for each site and estimated based on current requirements and usage of the assets. This estimate is updated each year and management considers it highly unlikely that this assumption will materially change in the next 12 months. However, if the regulation of environment restoration changed during the year, this could have a material impact on the provision.

Timing of outflow: The estimates are based on cash outflows being required at the end of the remaining life of the permit. This is between 13-48 years depending on the site. It is highly unlikely that the timing of these cash outflows will change within the next 12 months. However, if the cash out flows were required significantly earlier (for example the remaining life of permits were shortened) this could have a material impact on the provision balance, due to the discounted cash flow model used.

31. Council 2018/28 Long Term Plan (LTP) and Uniform Annual General Charge (UAGC)

Council consulted in the 2018/28 LTP on implementing a new UAGC of \$50.00 + GST.

In that same LTP Council also consulted on an increase in the Emergency Management targeted rate on Capital Value to fund an increase of \$450,000 in Emergency Management capability.

Following consideration of public submissions Council decided to fund the increase in Emergency Management capability by an addition to the UAGC of \$22.50 + GST rather than increasing the Emergency Management targeted rate in the \$ on Capital Value.

Although this was beyond the scope of the LTP Consultation Document, as it was not mentioned as an option, after considering matters raised in various submissions Council believed that the increase in the UAGC from \$50.00 + GST to \$72.50 + GST to be the fairest method of funding the increase in Emergency Management capability.

Council did not go back for further public consultation on the additional \$22.50 + GST because it felt that the actual net \$ impact (modelled on a \$200,000 Capital Value Dwelling) was minimal.

These impacts were modelled as follows;

Impact of impact on a \$200,000 CV dwelling

Roll back of originally suggested increase in Emergency	-	\$25.88 GST inclusive (\$14.14 GST inclusive)
Management Rate in \$ of CV		,

32. Rating Base Information Required to be disclosed pursuant to the Local Government 2002 Amendment Act 2015

(a)	The number of rating units within the West Coast region as at 30 June 2019	22,319
(b)	The total capital value of these rating units as at 30 June 2019	\$7,329,860,425
(c)	The total land value within the West Coast region as at 30 June 2019	\$3,727,821,500

33. Information regarding Insurance of Assets as at 30 June 2020

(a)	The total value of all assets of the West Coast Regional Council that are covered by insurance contracts.	
	Land & Buildings, Plant & equipment, Motor Vehicles, Commercial Property Values included in Statement of Financial Position.	\$5,581,474
	Buildings are insured for replacement values Plant & Equipment is insured for indemnity value Motor Vehicles are insured for market value Inventory is insured for indemnity value	\$8,261,600 \$800,000 \$884,900 \$200,000
(b)	Total value of assets that are covered by risk sharing arrangements	\$87,821,549
(c)	Total value of assets that are self-insured	Nil

Governance

Governance covers the costs of operating the democratic function of the Council. Elected Councillors determine policies, and monitor the achievement of these.

Key Changes from the 2018/2028 Long Term Plan: None.

Resource Management Activities

Background

The Resource Management Act 1991 (RMA) requires regional councils to have certain RMA Plans to provide certainty to resource users on when consents are required.

activities with greater potential effects. The Council also has a Pest Plant Strategy to take a strategic and prioritised approach to managing pest plants in the region. All Plans The plans enable activities with no more than minor adverse effects to be carried out without needing resource consent, and also provide policy guidance on assessing are required to be reviewed within the ten-year period by law, by inviting public submissions

The Council also makes submissions and responds to other resource management documents or proposed government policies or standards where these may affect the West Coast. This is in order to advocate for the interest of the West Coast communities.

Council monitors the state of our environment to detect trends in environmental quality and to detect emerging issues. This information is fundamental for assessing the effectiveness of resource management policies and plans. It assists Council to make decisions based on sound factual and up to date information. Resource consents allow activities that are otherwise restricted by the RMA. Our Consents team processes over 500 individual resource consents each year, on average. This level of demand is not expected to change significantly over the next ten-year period

compliance is detected the Council's Enforcement Policy guides decisions around enforcement actions. This is a critical element of resource management that underpins the Compliance monitoring and enforcement involves monitoring the exercise of resource consents, permitted activity dairy shed discharges and mining permits. Where nonintegrity of the regional plans and consents issued under them.

Under the Maritime Transport Act 1994 the Regional Council is responsible for responding to marine oil spills within the territorial waters of the West Coast.

RMA Staff are also trained to respond to terrestrial hazardous substance spills, assisting the responsible party to clean up spills in order to minimise environmental impacts.

Levels of Service	Measure	Performance Target	Progress Achieved
	Stream ecosystem health: Instream macroinvertebrate community health (SQMCI) scores are measured at 29 river sites. The values for each site are calculated using five year rolling means and comparing them to baseline means calculated from data from 2005-2009.	Macroinvertebrate health index² (SQMCI) mean is higher, or no more than 20% lower, than the baseline mean.	Not achieved. Three out of 29 sites have not met the criteria and have declined. (2019: five) Macroinvertebrate data is collected twice a year in spring and autumn. Macroinvetebrate are to an extent dynamic and respond to many environment factors such as climate variability, habitat and water quality. It is possible that a reduction in habitat and water quality has led to deterioration in stream health. The magnitude of change and the duration it occurs at will be informative.
To maintain or enhance the life supporting capacity and amenity value of the West Coast's rivers	Bathing beach sampling: 18 swimming sites are sampled, ten times per summer season (fortnightly) for E coli (moderatehigh risk > 550) or Enterococci (moderate-high risk > 280). [note - two more sites are added this term] (the sites were temporally increased to monitor additional areas that could potentially cause concern).	Schedule swimming sites do not exceed the moderate-high risk threshold more than once during the summer sampling season.	Not achieved – Four out of 18 sites have not met the target. (2019:2) During the 2019-2020 season Hokitika Beach, Seven Mile Creek@SH6 Rapahoe, Grey River @ Taylorville swimming hole and Marrs Beach, exceeded the moderate-high risk category more than 10% of the time. E coli comes from all land, whether urban, agricultural or forest. Urban and agricultural land use normally lead to higher concentrations. Higher E coli concentrations will always occur during we weather. The region, having high rainfall, is prone to E coli exceedances. Anthropogenic sources of E coli (eg livestock and urban stormwater) are the most likely sources of exceedances, however there are examples when water birds in large congregations have led E Coli spikes.
To protect human health from adverse impacts of poor groundwater quality.	28 Wells are monitored at least twice annually, 24 of which are used for human consumption. The guideline of 11.3mg/L of nitrate is used to protect human health, particularly for babies. The data from the year is averaged before comparing against the 11.3mg guideline.	In wells used for human consumption, nitrate levels remain below the health guideline of 11.3 mg/L.	Achieved Averaged over Winter 2019 and Summer 2020 (Council was unable to gather samples for the winter period 2020 as the COVID-19 lockdown resulted in a backlog for external laboratory testing), all of 24 wells used for human consumption were within guidelines. (2019:24)

2 This macroinvertebrate index uses comparative samples of aquatic invertebrates to evaluate water quality, based on the type and tolerances of invertebrates (bugs) found at that site and how those communities of invertebrates may change over time. Some bug species are pollution to learn while others are pollution sensitive, so the mix of species tells us a lot about the water quality at the site.

Levels of Service	Measure	Performance Target	Progress Achieved
To protect human health from any adverse impacts of poor air quality in Reefton.	Reefton's air is monitored in accordance with the National Environmental Standard (NES) for air quality by measuring PM ₁₀ (airborne particles smaller than ten micrometers, which affect human respiration). The threshold is a 24hr mean PM ₁₀ of 50 micrograms/m³.	NES Requirement: 24hr PM ₁₀ values do not exceed the NES threshold more than three times in one year, between 2016 & 2020; whereas after 2020 only 1 exceedance per year is allowed.	Not achieved. There have been two 24 hr PM $_{10}$ averages over 50 ug/m 3 to date (23/7/20). This is an exceedance of the National Environmental Standard for Air Quality in Winter 2020.
Respond to all genuine incident complaints received by the Council and take enforcement action where needed.	Number of complaints received and number of enforcement actions resulting from these.	Operate a 24-hour complaints service, assess and respond to all genuine complaints within 24 hours and non-urgent complaints within 5 working days in accordance with Council's Compliance & Enforcement Policy.	Achieved. The 24 hour complaints service is operational with compliance staff rostered for on call. There were 212 complaints/incidents received which resulted in 133 site visits.

Levels of Service	Measure	Performance Target	Progress Achieved
Compliance with the consent processing timeframes in the RMA and mining legislation.	Compliance with discounting regulations and mining timeframes	Process all resource consent applications without incurring any cost to Council due to the RMA discounting regulations; and process at least 95% of mining work programmes³ within 20 working days of receipt.	99% Achieved All resource consent applications except one were processed within the RMA timeframes. One consent was outside of timeframes and discounting applied. There were 101 work programmes received, all of the work programmes were processed within 20 days.
Respond to marine oil spills in coastal waters in accordance with the Tier 2 Oil Spill Response Plan and maintain readiness for spill response.	Timing of responses & number of trained staff	Respond within 4 hours to all spills, using Council or MNZ spill equipment to contain spills; plus ensure at least 10 trained responders.	No major spills occurred during the reporting period. Maritime NZ requirements now state that ten staff are required. Number of trained responders is well in exceedance of 10. Five incidents were attended over the year.

47

Regional Transport Planning

Backgrour

The Council primarily has a co-ordinator and administrator role in relation to transport issues so that funding can be effectively accessed from the New Zealand Transport Agency. In order to obtain that funding the Council must adhere to the Land Transport Act 1998 and the Land Transport Management Act 2003.

Council must appoint a Regional Transport Committee, with membership to include local authorities, funding agencies and other transport stakeholders who then prepare a Regional Land Transport Plan (RLTP) to access funding from the national land Transport fund

Section 35 of the Land Transport Management Act 2003 requires that the needs of persons who are transport disadvantaged be considered in land transport programmes. To implement this function, Council administers subsidies for transport for those with limited mobility through the Total Mobility Programme. The Regional Council also participates on the Regional Road Safety Committee as an organisation with transport interests, and oversees the Road Safety Co-ordinator.

Progress Achieved	Achieved. The RLTP was made operative in 2018. Variations to this document are made as required to ensure that transport activities can be undertaken in a timely manner.	
Performance Target Progress Achieved	Compliance with statutory requirements for the preparation, review and implementation of the Regional Transport Plan and Passenger Transport Plan Plan.	
Measure	An operative Regional Land Transport Plan.	
Levels of Service	Maintain a Regional Land Transport Plan in compliance with relevant legislation and is acceptable to the West Coast community.	

Hydrology and Flood Warning Services

Background

Section 35 of the RMA requires councils to monitor the state of the environment. Hydrology monitoring records trends in water levels in key rivers and can also detect emerging issues. This information assists Council to make decisions based on sound factual and up to date information. Flood warning provides information to civil defence, police and local communities that enables them to assess risk of flood events, so appropriate action can be taken.

Level of Service	Measure	Performance Targets	Progress Achieved
Continue to provide flood warning to assist communities to assess risk of impending	Staff response to high flow events.	Provide flood monitoring service for the six rivers monitored (Karamea, Buller, Mokihinui, Grey, Hokitika, Waiho) and respond in accordance with the floodwarning manual.	Achieved. Calls were made alerting necessary parties as required by the Flood Warning Manual. Provide flood monitoring service for rivers monitored (Karamea, Buller, Mokihinui, Grey, Hokitika and Waiho) and respond by attempting to contact identified relevant parties for each river as necessary.
floods, for the six rivers (Karamea, Mokihinui, Buller, Grey, Hokitika, and Waiho).	Availability of information about high flow events.	Ensure data on river levels (Karamea, Buller, Grey, Hokitika, Waiho, Mokihinui) is available on the Council website (updated 12 hourly, or 3-hourly during flood events) > 90% of the time	Achieved. As part of the hydrology monitoring system data is automatically updated on the Council website for the Karamea, Buller, Mokihinui, Grey, Hokitika and Waiho key flood warning sites at intervals more frequent than 12 hourly or 3-hourly during flood events.

Emergency Management

Backgrou

Regional Council Chair; while the coordinating Executive Group (CEG), which is the main working group of civil defence in the region, is made up of the CEOs of the Councils plus emergency services and health representatives. The CEG generally reports to the CDEM Group quarterly. There is also an engineering lifelines group which provides advice. The Council is part of the Civil Defence Emergency Management (CDEM) Group, along with the region's District Councils. The Group is made up of the Council Mayors and

The functions of the CDEM Group include the co-ordination of civil defence emergency management planning, delivering CDEM programmes and CDEM activities across the region, and carrying out risk management. The Regional Council is the administering authority for the West Coast CDEM Group. The current West Coast CDEM Group Plan dated November 2015, replaced the earlier 2010 version. A review of the current plan must commence before October 2021 The LTP levels of service and performance targets reflect only this Council's role in the CDEM work. District Council LTP's and Annual Plans will have CDEM targets related more to community readiness and response activities, whereas the regional council role is regional co-ordination.

Level of Service	Measure	Performance Targets	Progress Achieved
Maintain a Civil Defence Plan that delivers efficient and effective management of the region's civil defence functions in compliance with the legislation and is acceptable to West Coast community desires.	Civil Defence Plan always operative.	Compliance with statutory requirements for the preparation, review and implementation of the Group CDEM Plan.	Due to the preparation for, activation and resurgence planning for COVID-19 we were unable to give full focus on the work programme in 2020. However, while this meant little progress was made on some items, there were opportunities to progress other areas of work in advance of the existing work programme. For example, development and testing of standard operation procedures for pandemic, providing activation experience for a broad range of council employees, and establishing an Emergency Coordination Centre standalone from the regional council that had the digital capability to work in a national TEAMS environment. We have revised our work programme to reflect COVID-19 activity while continuing to meet out statutory requirements. We are on track to commence the review of our current Group CDEM plan before October 2021.

Level of Service	Measure	Performance Targets	Progress Achieved
Maintain a Civil Defence Plan that delivers efficient and effective management of the region's civil defence functions in compliance with the legislation and is acceptable to West Coast community desires.	Number of trained staff	Ensure at least 30 Council staff are trained as Emergency Coordination Centre (ECC) personnel so that we have three shifts of ECC staff trained and exercised in case of a regional emergency.	We were unable to ensure 30 council staff are trained as Emergency Coordination Centre personnel for this financial year. There were 25 staff in total trained in the 2020 year. We have held EOC, Welfare Function, and CIMS 4 course in the first six months with good participation from Regional Council staff. Our training programme for 2020 was interrupted by the COVID-19 response activation. However, the activation for the December flooding and road closures, in addition to the large contingent deployed for the COVID-19 response, saw WCRC staff support the response efforts and get valuable experience. We would be challenged to have three shifts of ECC staff utilizing only WCRC staff. For recent events we have been able to join up with staff from either Grey or Westland Districts to ensure we have sufficient resourcing. A more strategic approach is required to ensure more widespread availability of trained staff.

River, Drainage and Coastal Protection Works

Background

functions, the Council manages existing protection works for Rating Districts throughout the Region, participates on the Joint Greymouth Floodwall Committee, and rates The Soil Conservation and Rivers Control Act 1941 requires the Regional Council to prevent and mitigate soil erosion, and prevent damage by floods. To carry out these for structural maintenance of the Greymouth Floodwall.

example, if gravel build-up increases the risk of flooding and harm or damage to people and property. The work will be done according to recognised engineering standards section studies and aerial photography of some riverbeds and coastal areas are carried out to monitor gravel build-up and changing patterns in river systems. This assists to identify what, if any, maintenance or additional protection is needed for Rating Districts. This work will be done as needed depending on the urgency: for and practices and according to the affordability to the local community who are funding the work needed.

The Council Rating Districts all have different levels of flood protection according to the history of the works and the affordability issues for the funding community. The following section sets out the levels of flood protection or 'levels of service' for each scheme.

The Council manages quarries to ensure security of supply of rock for rating district protection works. This work has traditionally run at a small loss due to low and unpredictable volumes of rock sales, although for the past few years the quarries have performed better than break-even

to existing protection works in the existing Rating Districts, however there are not always rock sources close by to the flood and river protection works that need repair or Management plans have been prepared for each rock quarry. The speed of quarry development is driven by demand for rock, therefore the performance targets focus on the process for managing the quarries. There generally appears to be sufficient rock in the existing quarries to supply the anticipated level of maintenance or additions

The cost of any additional quarries, or maintenance of existing ones, will be paid for either on a user pays basis, or based on quantities of rock used

Levels of Service for Quarries	Measure	Performance Targets	Progress Achieved
Ensure efficient and effective management and	Timing of delivering on rock requests.	Deliver on requests for rock within two weeks, and ensure sufficient stockpiled rock is available where practical.	Achieved. All requests for rock were delivered within the specified timeframe.
safe operation of Council's quarries, delivering rock to any customers within ten working days with priority given to Council rating district customers.	Number of site inspections to monitor contractor health and safety and performance	Visit each active quarry site at least twice a year, when contractors are working the quarry (where possible), to ensure Health and Safety standards and other permit requirements are being adhered to.	Achieved. Each quarry was visited twice a year while contractors were working and the necessary permits and health and safety standards required of the contractors were observed and deemed satisfactory.

Levels of Service	Measure	Performance Targets	Progress Achieved
			Achieved All inspections were undertaken before the 2019 Rating District meetings, however there is no formal record of monitoring for the periods between rating district annual general meetings.
			Works have been carried out during the year in the following areas to return assets to agreed service levels.
			• Karamea • Coal Greek

Local Government (Financial Reporting and Prudence) Regulations 2014

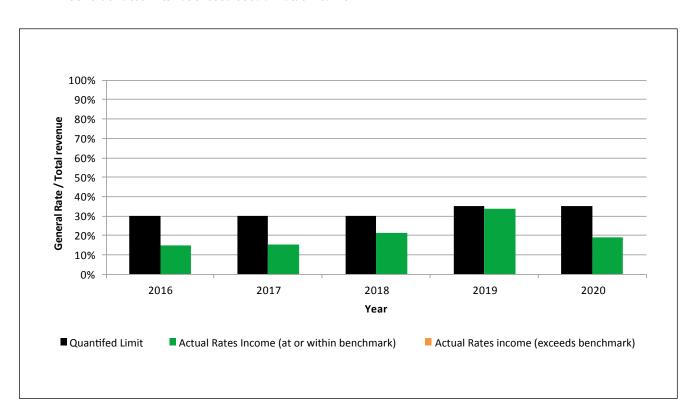

Council is required to include these statements in its Annual Report in accordance with these regulations.

RATES AFFORDABILITY BENCHMARKS

Council meets the various rates affordability benchmarks if its actual rates income is equal to or less than the quantified limit.

1. The first benchmark, (included by Council in the Financial Strategy contained in the 2018/28 Long Term Plan).

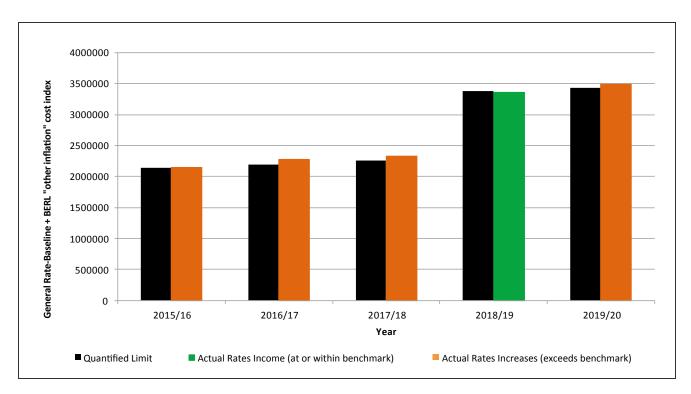

General Rates will not exceed 35% of Total Income

Rates (Increases) Affordability

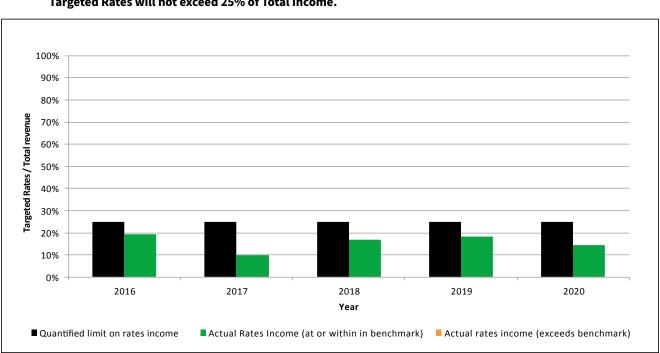

2. The second benchmark, (included by Council in the Financial Strategy contained in the 2018/28 Long Term Plan).

The General Rate will not exceed the estimated Business and Economic Research Ltd (BERL) "Local Government Cost Index" adjustments.

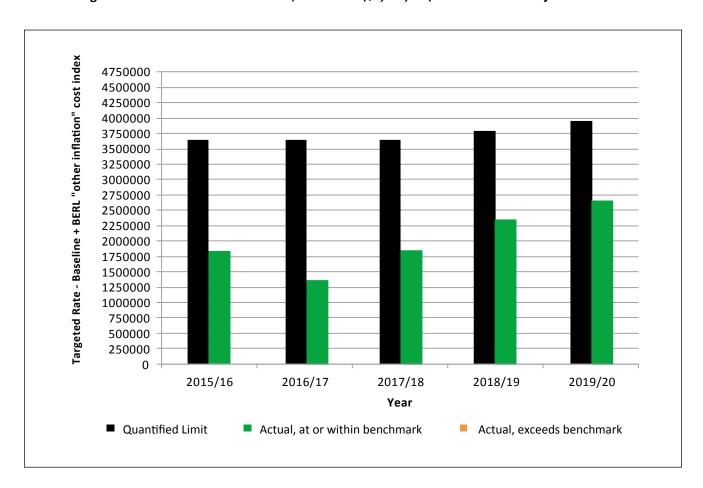

3. The third benchmark, (included by Council in the Financial Strategy contained in the 2018/28 Long Term Plan).

Targeted Rates will not exceed 25% of Total Income.

4. The fourth benchmark, (included by Council in the Financial Strategy contained in the 2018/28 Long Term Plan).

Targeted Rates will not exceed the 2018/19 baseline (\$1,899,422) + 100% over the 10 year term of the LTP

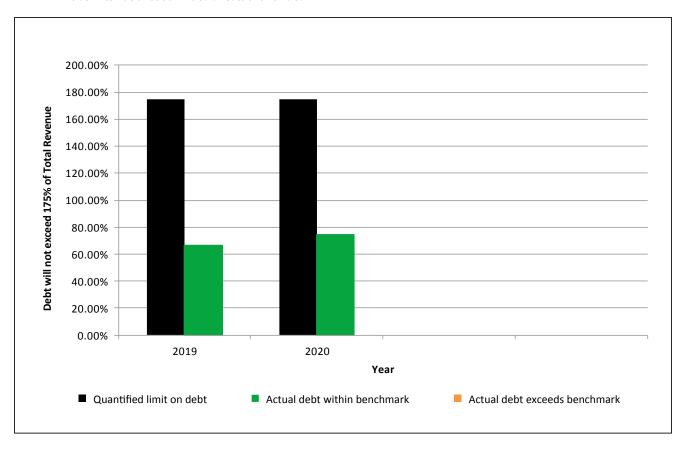

69

5. Debt Affordability Benchmarks

Council meets the various debt affordability benchmarks if its actual borrowing is within each quantified limit on borrowing. The sixth benchmark, (included by Council in the Financial Strategy contained in the 2018/28 Long Term Plan).

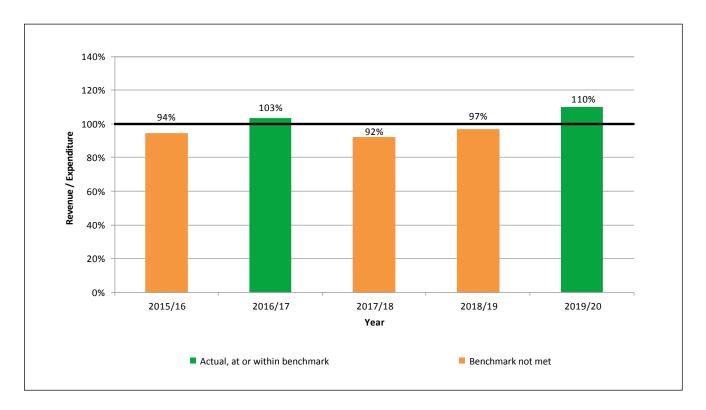

Debt will not exceed 175% of total revenue.

Mandatory Benchmarks as prescribed by the Regulations

6. <u>Balanced Budget Benchmark</u>

Council meets this benchmark if its revenues equal or exceed its operating expenses. The following graph displays the council's revenue (excluding development contributions, financial contributions, vested assets, gains on derivative financial instruments, and revaluations of property, plant, or equipment) as a proportion of operating expenses (excluding losses on derivative financial instruments and revaluations of property, plant, or equipment).

7. Essential Services Benchmark

Council meets this benchmark if its capital expenditure on network services equals or is greater than depreciation on network services. Network services means infrastructure related to:

- (a) Water supply;
- (b) Sewerage and the treatment and disposal of sewage;
- (c) Stormwater drainage;
- (d) Flood protection and control works; or
- (e) Provision of roads and footpaths.

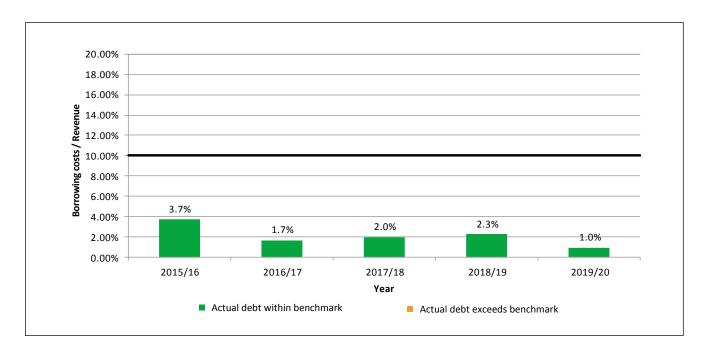

Council's only network services relate to flood protection and control works. Council does not provide any other network services. These network services are in the form of assets such as rock protection, stopbanks, seawalls etc. These assets are not subject to depreciation. Council's capital expenditure on flood protection and control network assets will always be equal to or greater than the depreciation expense.

As there is no depreciation, the graph required by schedule 5 of the Local Government (Financial Reporting and Prudence) Regulations 2014 cannot be produced.

8. <u>Debt Servicing Benchmark</u>

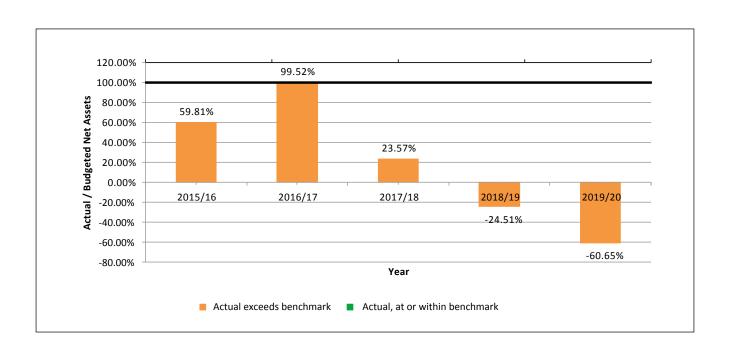

The following graph displays the council's borrowing costs as a proportion of planned revenue (excluding development and financial contribution, vested assets, derivative financial instruments and revaluations of property plant or equipment.

Because Statistics NZ projects council's population will grow more slowly than the national population is projected to grow, it meets the debt servicing benchmark if its planned borrowing costs are equal to or less than 10% of its planned revenue.

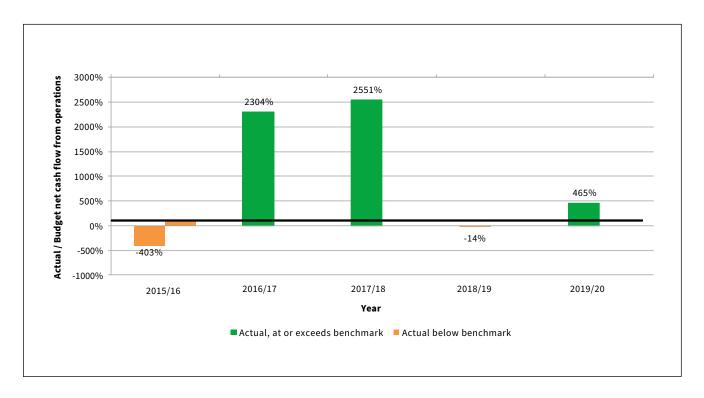

Debt Control Benchmark

Council budgets to have net assets (financial assets (excluding Trade & Other Receivables) exceeds its debt). Council meets this benchmark if its actual net financial assets are equal to, or is more than, its planned net assets.

Operations Control Benchmark

Council meets this benchmark if its actual net cash flow from operations for the year is equal to, or greater than, its planned net cash flow from operations for the year.

Major Budget Variations

Explanations

- Governance was \$40k over budget due to higher than anticipated overhead of \$20k and course and conference being \$17k higher than budget. This was mainly due to so many new councillors being elected.
- 2 Resource Management was \$185k over budget mainly due to overheads being higher than budgeted.
- 3 Hydrology was (\$133k) under budget due to the following:
 - a) A number of positions remained vacant during the year resulting in salaries being (\$60k) under budget
 - b) Consultants were not used at all in the 2019/2020 year so an unused budget of (\$20k) remained at the end of the year
 - c) Other sundry expenses were under budget by (\$17k)
 - d) Depreciation was under budget by (\$27k) as some old assets had been written off and some capital works had not been carried out.
- 4 Emergency Management was \$336k over budget due to the following:
 - a) Chargeable work for Ministry of Emergency Management had unbudgeted expenditure of \$65k however this was reimbursed by them.
 - b) The December 2019 rain event resulted in unbudgeted expenditure of \$88k. Council did receive a subsidy for this however.
 - c) COVID-19 resulted in an unbudgeted expenditure of \$73k.
 - d) Overheads actuals were \$111k higher than budgeted.
- 5 River, Drainage and Coastal Protection was \$537k over budget due to the following:
 - a) Rebuild of the River Protection for a number of Rating Districts due to the rain event of March 2019 which were at Lower Waiho \$303k, Inchbonnie \$60k, Taramakau \$28k, Vine Creek \$171k, Waitangitoana \$77k and Wanganui \$208k. Some of these were offset by work not completed in the likes of Franz Josef as there was not enough council resource.
 - b) Inchbonnie was \$60k over budget due to urgent flood protection works, which was also related to the March 2019 rain event.
- Vector Control Services \$2.4 million over budget due to Aerial expenditure being higher than anticipated, however this was offset by additional income received.
- 7 Council interest in Pest Control Research LP was treated as impaired @ 30 June 2020 as Council sold its subscribed capital of \$696,612 for \$1 in December 2020.
- 8 Subsidies and Grants were \$1.7m over budget due to the following:
 - a) Rating Districts receiving \$932k in subsidies from the Ministry of Civil Defence and Emergency Management for damage in the 2019 March Flood event.
 - b) Emergency Management received an additional \$220k for the March 2019 rain event and COVID-19.
 - c) One District Plan received an unbudgeted \$200k grant from Local Government as a contribution to the ongoing work in this area.
- 9 Insurance Recoveries of \$974k relates insurance payment for the Lower Waiho rebuild.
- 10 Commercial Property Revaluation was \$76k higher than anticipated due to the prolonged impact COVID-19 and worldwide lockdowns had on the financial market.
- Investment Income was (\$300k) lower than anticipated due to the prolonged impact COVID-19 and worldwide lockdowns had on the financial market.

- 12 Income from Associates was \$448k under budget due to Council's Associate's income did not produce the budgeted profits anticipated.
- 13 User Fees and Charges was \$3.2m over budget due to the following:
 - a) Vector Control Services income being \$3.409m more than anticipated.
 - b) Rating Districts were \$500k more than anticipated due to additional insurance recoveries for the March 2019 Rain Event.
- 14 Current Assets were \$1.2m more than budget due to:
 - a) Receivables being higher than budgeted specifically accrued income at 30 June 2020 which consisted of:
 - b) VCS income accrual of \$782K
 - c) Insurance Recoveries of \$833K
- Property Plant and Equipment was \$26m higher than budgeted due to a comprehensive valuation completed in the 2020 financial year.
- 16 Intangible Assets reduced by \$33k compared to budget due to amoritization of the intangible assets
- 17 Investment property was \$186k over budget due to the revaluation of councils commercial property.
- 18 Loan Advances were \$221k higher than budgeted because:
 - a) Non-current Warm West Coast Loan were \$126,000 lower than expected due to higher than expected repayments by borrowers.
 - b) There were non-current advances of \$347k not originally budgeted for to PCR LP to fund specialised lease improvements.
- 19 Investments in associates was \$585k lower than anticipated in the budget due to impairment of Council interest @ 30 June 2020.
- 20 Investment in CCO was \$21k less than expected due to the CCO returning a deficit for the 30 June 2020 financial year.
- Other Financial Assets were \$93K higher than budgeted mainly due to replenishing the Catastrophe Fund earlier than anticipated.
- 22 Current liabilities are \$4.5m higher than budgeted due to the following:
 - a) Short term borrowings being \$1.5m higher than budgeted due to the change in Councils Loan Structure
 - b) Payables were \$1.8m higher than budgeted due to expenditure on VCS Aerials and Stop Bank rebuilds incurred during
- Non Current Liabilities were \$153K under budget due to Long Tern portion of Term Debt to LGFA being slightly different (-\$198K) to that budgeted @ 30 June 2020. Also future Quarry restoration liabilities following recalculation @30 June 2020 was \$45k higher than budgeted.
- 24 Equity has increased substantially following the \$13.6 million revaluation of infrastructure @ 30 June 2020.
